

School Committee Policy:

#204

Administrative Regulations

The Superintendent will develop a set of Administrative Regulations which specify the required actions and detailed arrangement under which the schools will be operated. The Regulations will be organized by the School Committee Policy that they implement and maintained as a part of the School Committee Policy Book.

Distribution of new Administrative Regulations will include the School Committee. A copy of the School Committee Policy Book, including Administrative Regulations will be maintained in each school and in the central office, as well as being placed on the School Committee website for reference by school staff or interested parties.

In order to be valid, Administrative Regulations must in every respect be consistent with the policies of the School Committee and have as their goal assisting the staff in carrying out the policies of the Committee.
