

School Committee Policy:

#561

Student Social Events

The School Committee believes that social activities in school life assist students in learning how to enjoy worthwhile group events, how to plan and conduct activities, and how to contribute to the enjoyment of others. Therefore, school groups and classes may use school facilities to hold approved social events for their membership.

The principal shall evaluate and approve proposed social events in terms of contributions to student growth and morale, consistent with the educational mission of the Maynard Public Schools. Proper chaperoning shall be provided under direction of the principal or designee.

School organizations holding dances and other social functions will provide for adequate police protection to control traffic, to protect parking areas during the function, and to be present or on call as necessary for guarding the welfare of the guests and care of school property.
