

School Committee Policy:

#646

School-Based Public Access Automated External Defibrillation Program

It is the purpose of this policy to establish and formalize the standard operating guidelines that are required in order to have, maintain, and utilize Automatic External Defibrillators (AEDs) in the Maynard Public Schools according to the Massachusetts General Laws, Massachusetts Department of Public Health, and National Safety Council Standards. This program's guidelines will assist employees of the Maynard Public Schools who are trained and willing to use an AED in the event such use is necessary. These guidelines do not create an obligation to use the AEDs, nor to create any expectation that either an AED or trained employee will be present at every event. By equipping and training voluntary employees in the use of AEDs, we will increase the potential to save lives through AED intervention.
